

Citi Bike Data - May 2018

Most riders start their trips at stations located in Manhattan, which is expected since people are more likely to use bikes in an area where driving may not be the best option due to traffic.

Most rides are taken on Wednesday, and riders decline during the weekend. This weekend decline may be attributed to decreased work week commuters.

Peaks hours seem to be 8am and 5-6pm, consistent with typical work day hours.
